Instructions

^ COLLAPSE ^

Implement the Milestone 4 features from the project's proposal document: <https://docs.google.com/document/d/1ONmvEvel97GTFPGfVwwQC96xSsobbSbk56145Xl/edit>
Make sure you add your ucid/date as code comments where code changes are done
All code changes should reach the Milestone4 branch
Create a pull request from Milestone4 to main and keep it open until you get the output PDF from this assignment.
Gather the evidence of feature completion based on the below tasks.
Once finished, get the output PDF and copy/move it to your repository folder on your local machine.
Run the necessary git add, commit, and push steps to move it to GitHub
Complete the pull request that was opened earlier
Upload the same output PDF to Canvas

Branch name: Milestone4

Tasks: 15 Points: 10.00

 Demonstrate Chat History Export (2.25 pts.)

^ COLLAPSE ^

Task #1 - Points: 1

Text: Screenshots of code

Checklist

*The checkboxes are for your own tracking

#	Points	Details

screenshot just shows the user mike typing a message that has regular text, bold text, colored text, italic and underlined text, it also shows a /flip and /roll in 2 different colors being used.

Checklist Items (1)

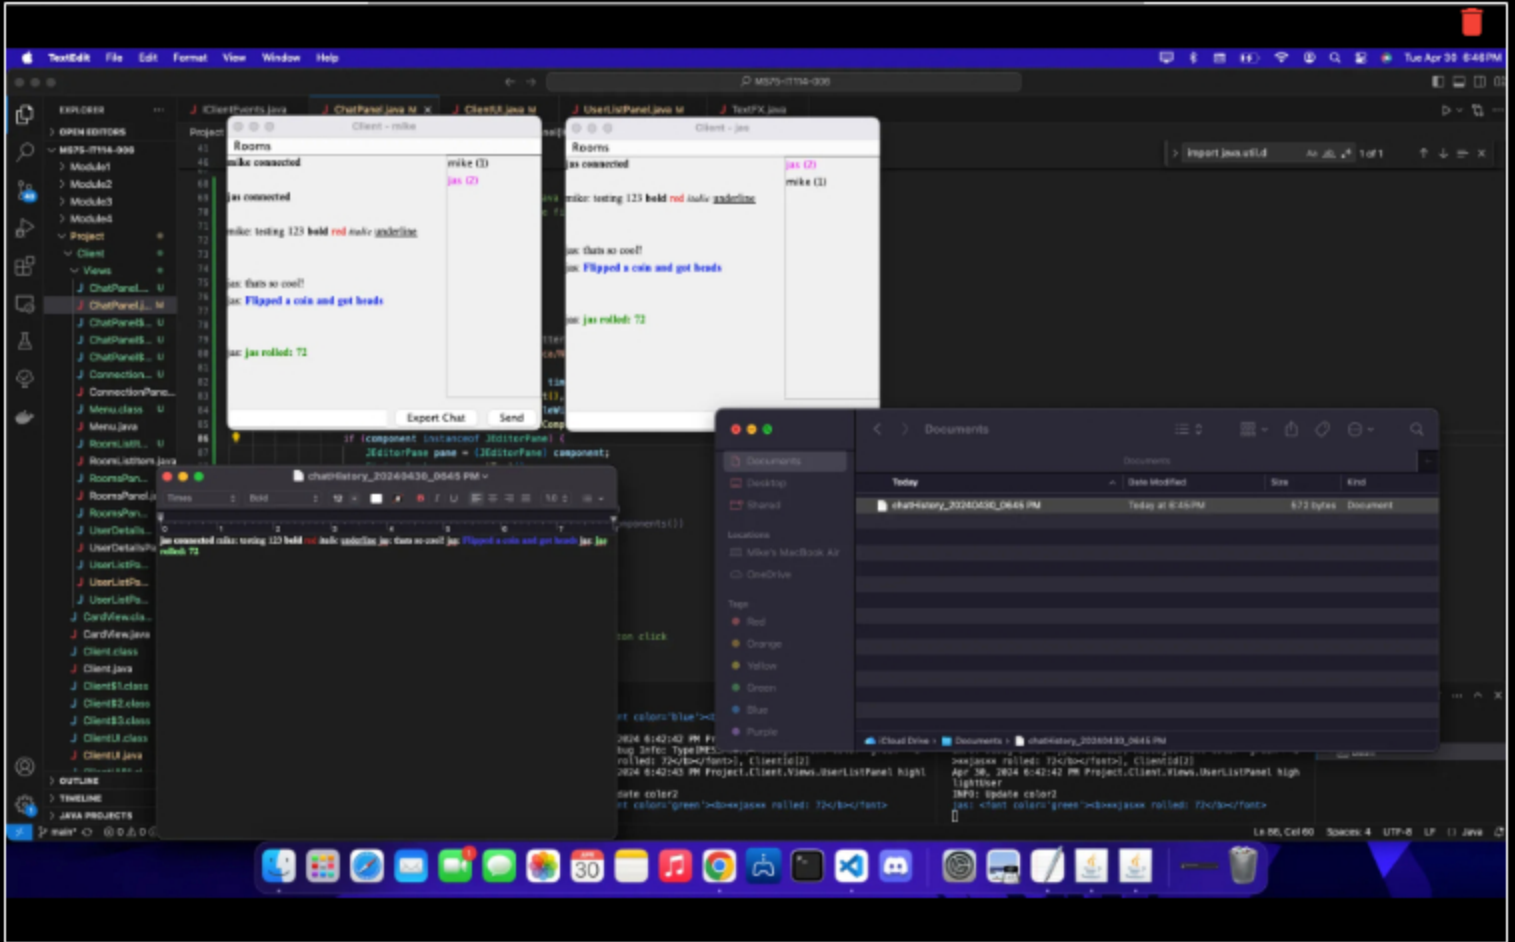

#1 Show content with variation of messages (i.e., flip, roll, formatting, etc)

Screenshot shows me saving the chat by pressing the export chat button and shows me saving it to my Documents directory, i had to enter the filename as chatHistory

Checklist Items (0)

Screenshot shows the file being saved into my Documents directory with the date and time stamp on the filename to avoid overwriting files.

Checklist Items (0)

COLLAPSE

Task #3 - Points: 1

Text: Explain solution

Checklist		*The checkboxes are for your own tracking
#	Points	Details
<input type="checkbox"/> #1	1	Mention where the messages are stored and how you fetched them
<input type="checkbox"/> #2	1	Mention how the file is generated and populated

Response:

response.

The messages are stored in the chatArea as a content object. Each content component of the chatArea is basically a message that the user has sent along with the clientName. So each message is fetched by going through all the components in lines 84-91. The printwriter is created in a printwriter try catch block where the components from chatArea are fetched using /getComponents and then the string from each jeditor pane are ran through the .getText method to retrieve the text from each component. This .getText stores the text from the pane as a string variable called text and the string variable is then printed out using printWriter.

Demonstrate Mute List Persistence (2.25 pts.)

^COLLAPSE ^

Task #1 - Points: 1

Text: Screenshots of the code

^COLLAPSE ^

Checklist

*The checkboxes are for your own tracking

#	Points	Details
<input type="checkbox"/> #1	1	Show the code that saves the mute list to a file with the name of the user it belongs to
<input type="checkbox"/> #2	1	Show the code that loads the mute list when a ServerThread is connected
<input type="checkbox"/> #3	1	Screenshots should include ucid and date comment
<input type="checkbox"/> #4	1	Each screenshot should be clearly captioned

Task Screenshots:

I had no progress on my mute feature since milestone 3 where I could not get it to work. I uploaded the attempted code in Milestone 3.

Checklist Items (0)

Task #2 - Points: 1
Text: Screenshots of the demo

Checklist			*The checkboxes are for your own tracking
#	Points	Details	
<input type="checkbox"/> #1	1	Show a user muting another user, disconnecting, reconnecting, and still having that user muted (same should be possible if the server restarts)	
<input type="checkbox"/> #2	1	This should also be reflected in the UI per related feature in this milestone	
<input type="checkbox"/> #3	1	Each screenshot should be clearly captioned	

Task Screenshots:

^COLLAPSE ^

Task #3 - Points: 1

Text: Explain solution

Checklist

*The checkboxes are for your own tracking

#	Points	Details
<input type="checkbox"/> #1	1	Mention how you limit the messages in each scenario
<input type="checkbox"/> #2	1	Discuss how you find the correct user to send the message to

Response:

I had no progress on my mute feature since milestone 3 where I could not get it to work. I uploaded the attempted code in Milestone 3.

Demonstrate user list visual changes (2.25 pts.)

^COLLAPSE ^

^COLLAPSE ^

Task #1 - Points: 1

Text: Screenshots of the code

Checklist

*The checkboxes are for your own tracking

#	Points	Details
<input type="checkbox"/> #1	1	Show the code related to "graying out" muted users and returning them to normal when unmuted
<input type="checkbox"/> #2	1	Show the code related to highlighting the user who last sent a message (and unhighlighting the remainder of the list)
<input type="checkbox"/> #3	1	Screenshots should include ucid and date comment
<input type="checkbox"/> #4	1	Each screenshot should be clearly captioned

Task Screenshots:

I had no progress on my mute feature since milestone 3 where I could not get it to work. I uploaded the attempted code in Milestone 3. I did get the highlighting the last client to talk feature to work and this picture shows the added code in the ChatPanel.java class. All that was added was the lastMessageHighlight method

Checklist Items (0)

This code shows the addition to the onMessageRecieve() method in the ClientUI.java file. All that was added was the last line that called the lastMessageHighlight method in the chatPanel class: chatPanel.lastMessageHighlight(clientId);

Checklist Items (0)

screenshot shows my highlightUser method that is called in the chatPanel.java file. The file gets all the components of the UserListPanel pane and sets the foreGround (front) color of the pane as MAGENTA or purple when called.

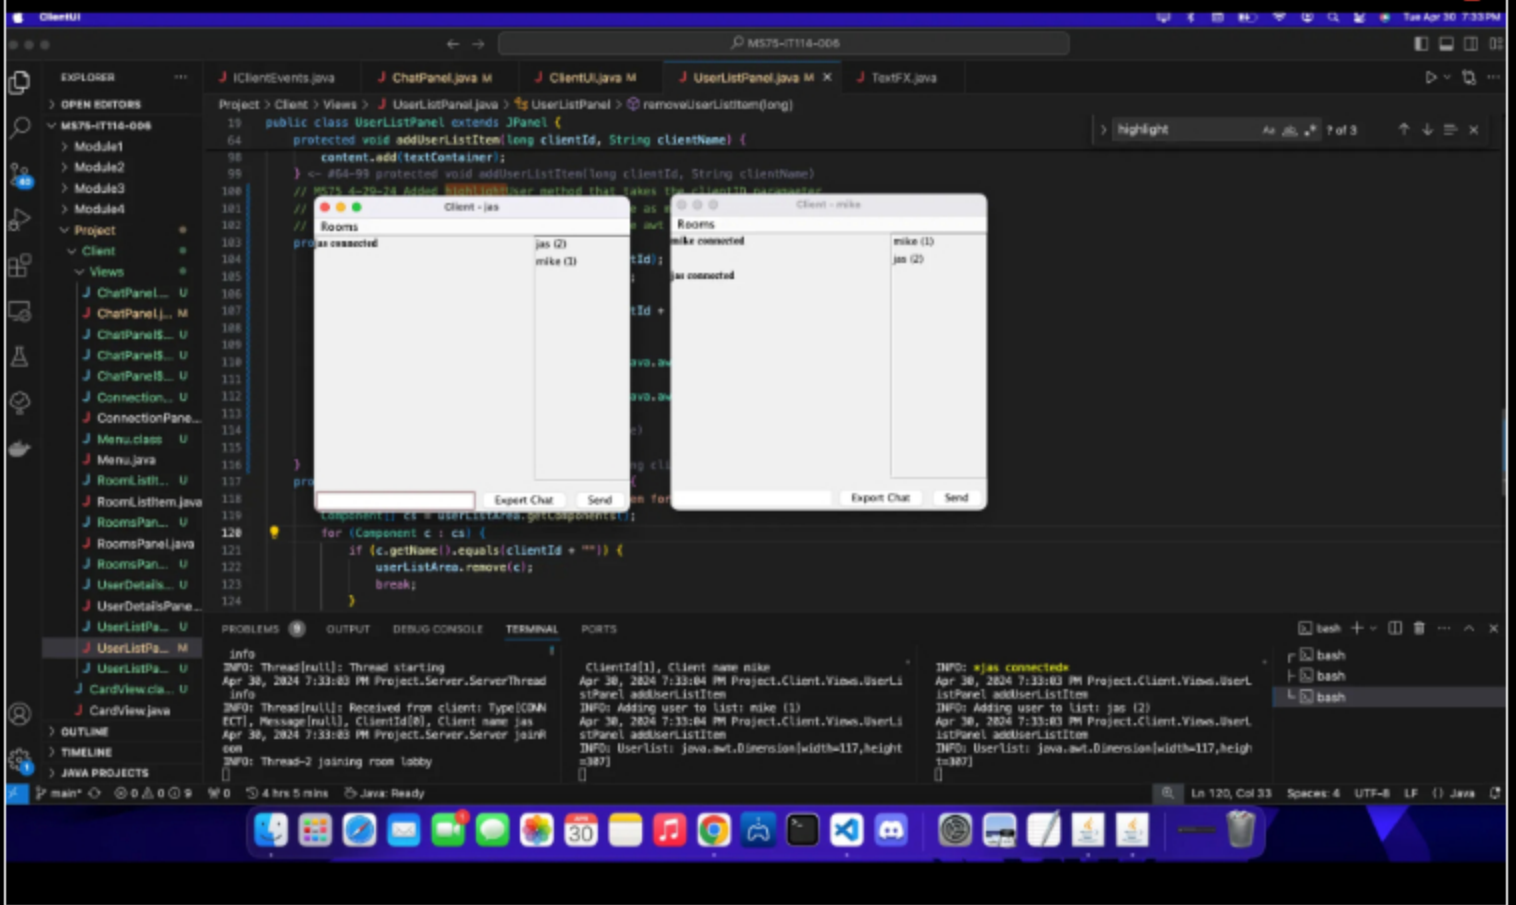

Checklist Items (0)

Task #2 - Points: 1
Text: Screenshots of the demo

Checklist			*The checkboxes are for your own tracking
#	Points	Details	
<input type="checkbox"/> #1	1	Show before and after screenshots of the list updating upon mute and unmute	
<input type="checkbox"/> #2	1	Capture variations of "last person to send a message gets highlighted"	
<input type="checkbox"/> #3	1	Each screenshot should be clearly captioned	

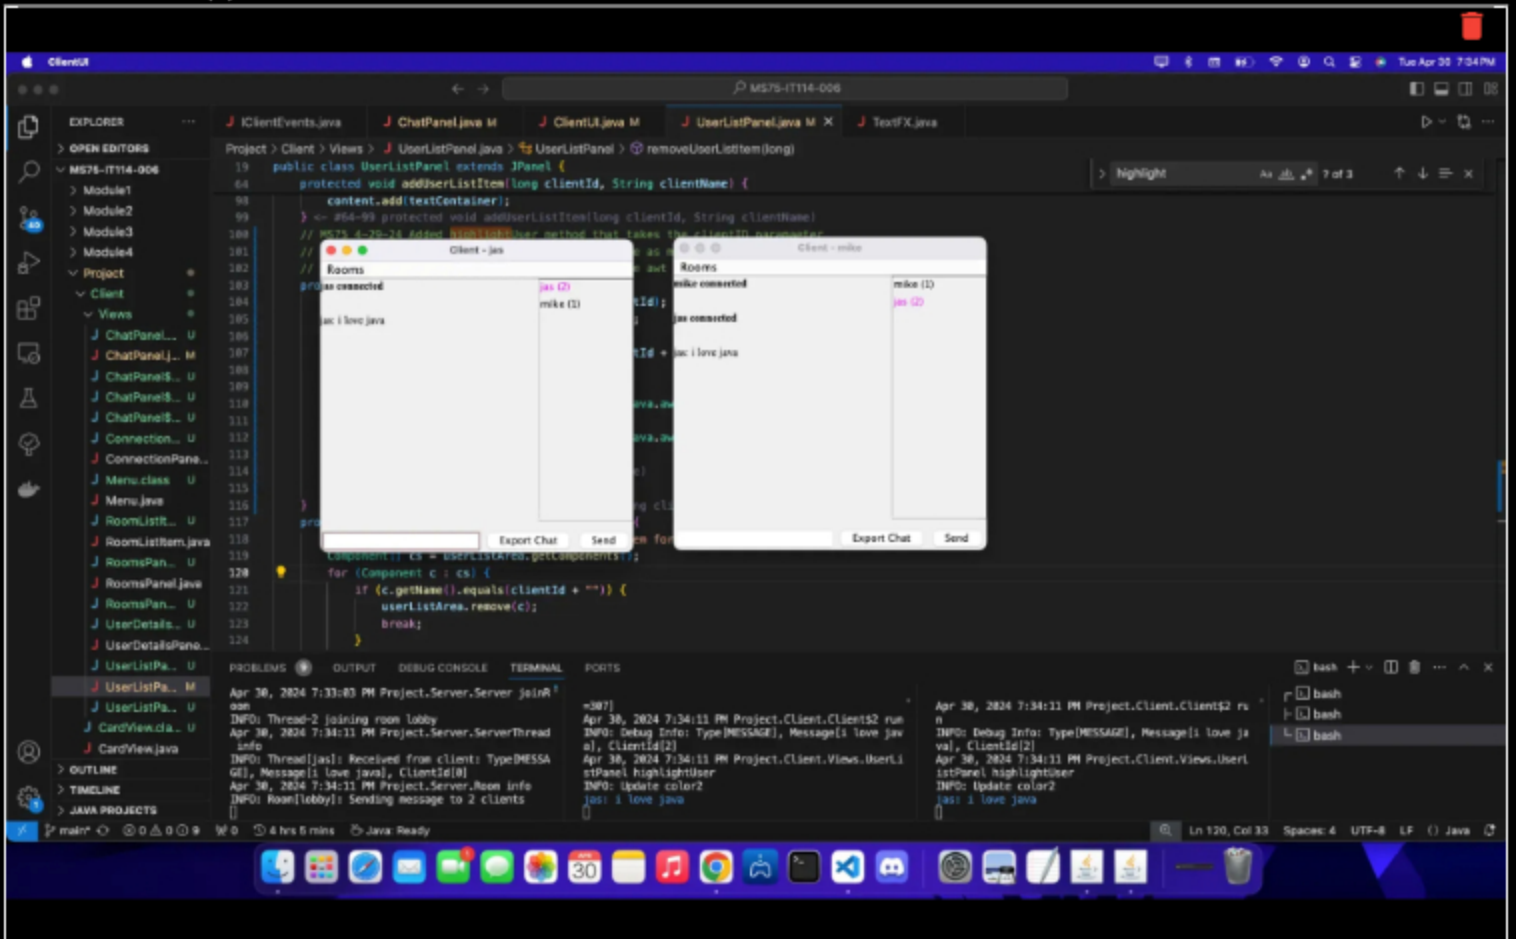

Task Screenshots:

Gallery Style: Large View

This screenshot just shows 2 clients connected with no user highlight.

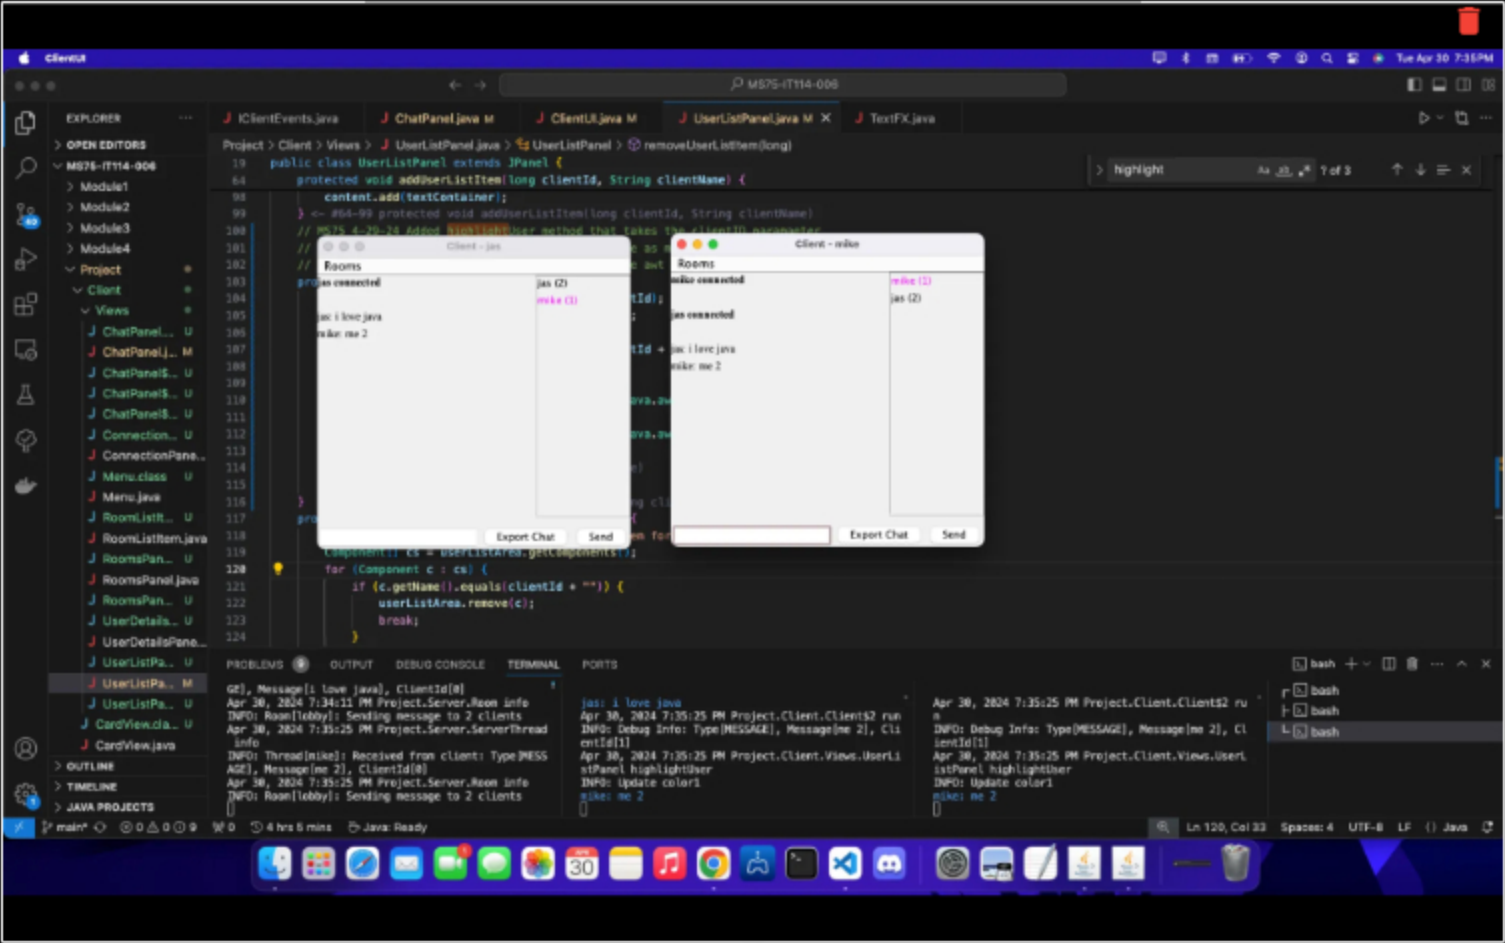

Checklist Items (0)

This screenshot shows that the client named Jas sent the first message in the room saying "I love java" and her name turned purple in the list of users.

Checklist Items (1)

#2 Capture variations of "last person to send a message gets highlighted"

This screenshot shows Mike replying to Jas's message and saying "me 2" and now Mike's name in the user list panel is purple.

Checklist Items (1)

#2 Capture variations of "last person to send a message gets highlighted"

COLLAPSE

Task #3 - Points: 1

Text: Explain solution

Checklist		*The checkboxes are for your own tracking	
#	Points	Details	
<input type="checkbox"/> #1	1	Mention how you got the mute/unmute effect implemented	
<input type="checkbox"/> #2	1	Mentioned how you got the highlight effect implemented (including unhighlighting the other users)	

Response:

I had no progress on my mute feature since milestone 3 where I could not get it to work. I uploaded the attempted code in Milestone 3.

Misc (1 pt.)

^COLLAPSE ^

Task #1 - Points: 1

Text: Add the pull request link for the branch

i Details:

Note: the link should end with /pull/#

URL #1

<https://github.com/mikes1302/MS75-IT114-006/pull/17>

Task #2 - Points: 1

Text: Talk about any issues or learnings during this assignment

Response:

I had issues using the textFX colors for the highlight user name feature, I ended up using javas AWT library instead. I also made no progress on the Mute and Private message features, no code was changed from Milestone3 to 4 for those 2 features. I commented out the code for Mute and PrivateMessage. I would have tried to change them for Milestone4 but I ran out of time.

Task #3 - Points: 1

Text: WakaTime Screenshot

i Details:

Grab a snippet showing the approximate time involved that clearly shows your repository. The duration isn't considered for grading, but there should be some time involved

Task Screenshots:

Gallery Style: Large View

Small

Medium

Large

Screenshot shows waketime time for past 14 days
